- Two 0.5 nights on MOSFIRE, Keck observatory, 2019 (PI: Tiantian Yuan)
- 1 night on FourStar, Magellan, 2018
- 0.5 night on OSIRIS, Keck observatory, 2017 (PI: Soniya Sharma)

- 7 nights on ANU 2.3 metre, WiFeS, 2013

**Data Expertise:** I am very well versed in spectroscopic data reduction from all previously listed instruments, especially multi-slit spectrographs (DEIMOS and MOSFIRE) and integral field spectrographs (WiFeS and OSIRIS). I developed the telluric correction, flux calibration and emission line extraction codes for the post-pipeline analysis of DEIMOS data. I have extensive experience with data from cosmological hydrodynamical simulations, specifically IllustrisTNG. I am also familiar with the HST and Green Bank Telescope data reduction.
